

## Custom PVC Pergolas

*"limited only by your imagination"*

PVC Rafters are tubular and interlocking to make assemble quick and easy. Standard size components allows for easy adjustment to size and shape. Combined with our Custom Column details, your finished result will be amazing.

# Columns Plus PVC Pergolas

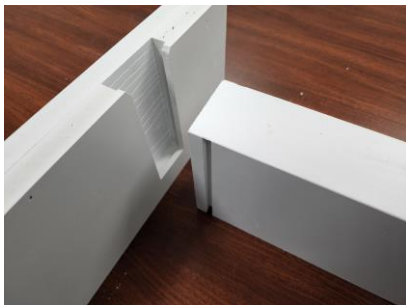

Since PVC is used in so many different configurations and is incorporated in many job site designs , it is not engineered for any load bearing applications. That said, there must be a wood structure underneath the pergola to attach components. Most builders cover the wood components as well with PVC to maintain a clean weatherproof surface that is easily painted to any color. For Column designs visit our details at [ColumnsPlus.ca](http://ColumnsPlus.ca)

Quick Connect  
Ledger Board

Rafter  
with lock
